PROFESSIONAL SUMMARY

Entry-level software and backend developer with strong skills in Java, Spring Boot, MySQL, REST APIs, and SQL. Hands-on experience in building and testing web applications, working with database operations, input validation, exception handling, API testing, and debugging. Familiar with Agile workflows, Git/GitHub, documentation, and deployment basics, with a solid foundation in full software development lifecycles. Also trained in Azure AI Essentials, machine learning fundamentals, and generative AI concepts, with the adaptability to contribute across backend, software, and application development roles.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering 2021 – 2025
Sharnbasva University, Kalaburagi **CGPA: 9.72/10**

Pre-University Course (PUC) – Science 2019 – 2021
Shree Guru Independent PU College of Science, Kalaburagi **Percentage: 93.83%**

TECHNICAL SKILLS

Programming Languages: Java, SQL, Python, JavaScript
Backend Technologies: Spring Boot, Spring MVC, Hibernate, JPA, Node.js, Express.js, REST APIs, JDBC, Servlets
Frontend Technologies: HTML5, CSS3, JavaScript, ReactJS, JSON, Responsive Design
Databases: MySQL, MongoDB, SQL Queries, Joins, Indexing, ORM, Schema Design, Data Normalization
Core Concepts: Object-Oriented Programming, Data Structures, Exception Handling, Multithreading, Dependency Injection, Design Patterns, Debugging, Problem Solving
Tools and Platforms: Git, GitHub, Maven, Postman, Eclipse, IntelliJ IDEA, Spring Tool Suite, VS Code, Jenkins, GitHub Actions, Docker (basics)
Development Practices: SDLC, Agile/Scrum, Code Review, CI/CD, API Testing, Application Support, Version Control, Deployment Basics
AI / Cloud: Machine Learning, Generative AI, Azure AI Studio, Cloud Fundamentals

TRAINING / INTERNSHIP

Software Development Intern – KodNest Technologies Mar 2025 – Jun 2025, Bengaluru

- Developed and tested Java-based backend modules using Spring Boot, REST APIs, and MySQL, gaining hands-on experience in server-side application development.
- Implemented input validation, exception handling, and request-response logic to ensure reliable backend performance and clean API execution.
- Wrote SQL queries for CRUD operations, joins, filtering, and transaction verification to maintain accurate data retrieval and database consistency.
- Used Postman to test API endpoints, validate JSON responses, and identify integration issues during module development and debugging.
- Worked in an Agile environment with Spring MVC, Hibernate/JPA concepts, and layered architecture to build maintainable backend components.

PROJECTS

SalesSavvy – SaaS E-Commerce Platform Java, Spring Boot, MySQL, REST APIs, JWT, Validation

- Developed backend APIs for e-commerce workflows including product, order, and user-related operations.
- Implemented input validation, exception handling, and structured database operations to maintain data consistency.
- Used MySQL for relational data storage, query execution, and transaction handling across multiple tables.
- Tested REST endpoints using Postman and ensured smooth request-response handling for application modules.

SkillSwap Platform Node.js, Express.js, MongoDB, React, API Development

- Built backend APIs for user authentication, profile management, and skill-matching features.
- Managed MongoDB collections and optimized query handling for efficient data storage and retrieval.
- Developed modular backend workflows with a focus on maintainability, debugging, and clean API design.

Vehicle Movement Analysis – Edge AI and Analytics Platform Python, SQL, Data Processing, REST APIs, Cloud, Analytics

- Developed data processing and backend-style workflows using Python and SQL for telemetry ingestion and structured analysis.
- Designed database schema and optimized query logic for filtering, aggregation, and efficient record retrieval.
- Built reporting logic for vehicle movement patterns, counts, and parking insights using clean and reusable code.
- Documented data flow, validation logic, and workflow steps to support maintainability and future enhancements.

ACHIEVEMENTS AND CERTIFICATES

- Department Topper and Gold Medalist, ECE (2025).**
- Microsoft Azure AI Essentials Professional Certificate** – Microsoft and LinkedIn Learning (2026).
- Full Stack Development Certificate** – KodNest (2025).
- Intel Unnati Industrial Training Certificate** – Edge AI/IoT Distributed Systems (2024).
