Professional Summary

Software Developer with hands-on experience in **Java, Spring Boot, REST APIs, JavaScript, Node.js, Express.js, React, SQL, and full-stack application development**. Currently contributing to **BFSI application development** at AccelTree Software, supporting development, UAT, and production activities across the application delivery lifecycle. Experienced in API development, authentication, database operations, debugging, feature validation, Git-based collaboration, Jenkins build workflows, and Agile SDLC practices. Strong foundation in OOP, DSA, Spring Security, CI/CD, and software quality practices, with a focus on building reliable and maintainable backend and full-stack solutions.

Technical Skills

Languages: Java, JavaScript, SQL
Backend: Spring Boot, Spring Security, Node.js, Express.js, REST APIs, JWT, Layered Architecture
Frontend: React, HTML5, CSS3, Vite.js
Databases: MySQL, MongoDB
Development Practices: OOP, DSA, API Integration, Unit Testing, Debugging, Documentation, Agile, SDLC, CI/CD
Tools: Git, GitHub, Jenkins, X code, VS code, Source tree, Postman, My SQL Workbench, Citrix, Jira, Linux, MS Office Tools.

Experience

Trainee Programmer — **Oct 2026 – Present**
AccelTree Software Pvt. Ltd. — *Pune, Maharashtra*

- Contribute to **BFSI application development** using **Java, Spring Boot, and JavaScript**, supporting banking, financial services, and insurance product workflows.
- Work across **development, user acceptance testing (UAT), and production environments** as part of the end-to-end application delivery lifecycle.
- Test application changes, validate functionality across environments, and support defect resolution and release readiness activities.
- Merge code changes and work with **Jenkins-based build and delivery workflows**, supporting version control, build automation, and deployment processes.

Intern Developer — **Jun 2026 – Oct 2026**
Amealio — *Pune, Maharashtra*

- Contribute to full-stack development of an AI-powered food-tech platform, working with senior engineers on production features, application workflows, and component-level implementations.
- Develop, integrate, and validate backend and frontend components using **Node.js, Express.js, React, MongoDB, and REST APIs**.
- Debug application issues by reproducing defects, analyzing logs, monitoring API behavior, and validating fixes to improve software quality and reliability.
- Participate in feature testing, API verification, release activities, and deployment workflows while following team processes and SDLC practices.
- Use Git-based workflows, technical discussions, and feedback from senior engineers to improve code quality, documentation, and delivery of assigned tasks.

Projects

SalesSavvy – Full-Stack E-Commerce Platform

- Developed a full-stack e-commerce application using Java, Spring Boot, React, and MySQL to support online shopping workflows.
- Built REST APIs for product catalog management, cart operations, and order processing using a layered backend architecture.
- Implemented user authentication and role-based access control using Spring Security and JWT to secure backend endpoints.
- Integrated React components with backend APIs and implemented MySQL database operations for product, cart, and order data.

SkillSwap – Full-Stack Web Platform

- Developed a full-stack web application using Node.js, Express.js, React, and MongoDB with modular frontend and backend components.
- Built REST APIs for user authentication, user management, and CRUD operations to support application workflows and data management.
- Integrated React components with backend APIs and validated end-to-end functionality across user-facing application modules.

Vehicle Movement Analysis – Intel Unnati – Edge AI Project

- Developed an Edge AI-based vehicle movement analysis project using Python and computer vision to detect and evaluate movement patterns.
- Used SQL for data processing and analytical workflows to support the analysis of vehicle movement information.
- Applied edge-based analysis techniques to examine vehicle movement patterns as part of the Intel Unnati training project.

Education

Bachelor of Engineering – Electronics and Communication Engineering — **2021 – 2025**
Sharnbasva University, Kalaburagi — CGPA: **9.72/10**
Department Topper | *Gold Medalist*

Certifications

DevOps – PagerDuty (2026) | Microsoft Azure AI Essentials (2026)
Full Stack Development – KodNest (2025) | Intel Unnati – Edge AI (2024)
