PROFESSIONAL SUMMARY

Detail-oriented and motivated backend developer with a strong sense of ownership, adaptability, and problem-solving ability. Brings a collaborative mindset and a commitment to delivering reliable, maintainable, and high-quality software solutions. Eager to learn, quick to adapt, and focused on contributing effectively in enterprise application development environments.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering	2021 – 2025
Sharnbasva University, Kalaburagi	CGPA: 9.72/10

Pre-University Course (PUC) – Science	2019 – 2021
Shree Guru Independent PU College of Science, Kalaburagi	Percentage: 93.83%

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL

Backend Technologies: Java SE, Java EE, Spring Boot, Spring MVC, Spring Core, Hibernate, JPA, REST APIs, Microservices, JSP, Servlets

Frontend Technologies: HTML5, CSS3, JavaScript, ReactJS (basics), JSON, XML

Databases: MySQL, MongoDB, SQL Queries, Joins, Indexing, ORM

Core Concepts: Object-Oriented Programming, Exception Handling, Multithreading, Dependency Injection, Design Patterns, Memory Management

Tools and Platforms: Git, GitHub, Maven, Gradle (basics), Postman, Eclipse, IntelliJ IDEA, STS, Jenkins, GitHub Actions, Docker (exposure)

Development Practices: SDLC, Agile/Scrum, Debugging, Testing, Code Review, Documentation, CI/CD, Application Support

WORK EXPERIENCE

Software Development Intern – Backend	KodNest Technologies
<i>Mar 2025 – Jun 2025, Bengaluru</i>	

- Developed backend modules for a SaaS e-commerce platform using Java, Spring Boot, Spring MVC, and RESTful architecture.
- Designed and implemented data access layers using Hibernate and JPA with MySQL and MongoDB, ensuring efficient entity mapping and transaction handling.
- Applied OOP principles, exception handling, and modular design to build maintainable and scalable application components.
- Used Git and GitHub for version control, Maven for build automation, and Jenkins and GitHub Actions for CI/CD workflow support.
- Collaborated with frontend developers and QA teams to test APIs, resolve defects, and improve endpoint reliability.
- Contributed to deployment readiness, defect resolution, and technical documentation across the software development lifecycle.

PROJECTS

SalesSavvy – SaaS E-Commerce Platform	<i>Java, Spring Boot, Spring MVC, Hibernate, JPA, MySQL</i>
--	---

- Built REST APIs for catalog, cart, and order management in a backend-focused e-commerce application.
- Implemented persistence logic using Hibernate and JPA with MySQL, focusing on clean entity relationships and efficient database operations.
- Applied layered architecture, transaction management, and exception handling to improve maintainability and reliability.
- Used Maven and Git throughout development and supported deployment-oriented workflows.
- Worked on modular and scalable backend design aligned with enterprise application standards.

Vehicle Movement Analysis – Edge AI Cloud Service	<i>Python, SQL, REST APIs, Cloud Deployment</i>
--	---

- Built a cloud-based data processing pipeline for ingesting and analyzing real-time telemetry data.
- Designed backend APIs for analytics and reporting workflows.
- Optimized SQL schema design and query performance for large-scale data storage and retrieval.
- Simulated distributed processing workflows to improve responsiveness and cloud integration.

ACHIEVEMENTS AND CERTIFICATES

- **Department Topper and Gold Medalist**, ECE (2025).
- **Full Stack Development Certificate** – KodNest (2025), specializing in Java, Spring Boot, and REST APIs.
- **Intel Unnati Industrial Training Certificate** – Edge AI/IoT Distributed Systems (2024).
