Professional Summary

Software Developer with hands-on experience building and debugging backend and full-stack applications using Java, Spring Boot, REST APIs, SQL, Node.js, Express.js, and React. Currently contributing to production features at a food-tech startup, working with senior engineers across API development, feature validation, debugging, and release workflows. Strong foundation in OOP, DSA, Git, CI/CD, and Agile development, with a focus on backend and full-stack engineering.

Technical Skills

Languages: Java, Python, JavaScript, SQL
Backend: Spring Boot, Node.js, Express.js, Django, REST APIs, Spring Security, JWT
Frontend: React, Vite.js, HTML5, CSS3
Databases: MySQL, MongoDB
Tools: Git, GitHub, GitHub Actions, Jenkins, Docker, Postman, Linux
Concepts: OOP, DSA, API Development, Authentication, Agile, CI/CD

Experience

Intern Developer — **Jun 2026 – Present**
Amealio — Pune, Maharashtra

- Contribute to full-stack development of an AI-powered food-tech platform, working with senior engineers on production features and application workflows.
- Develop and test features using **React, Node.js, Express.js, and MongoDB** across user-facing and backend modules.
- Debug application issues, analyze logs, monitor APIs, validate features, and assist with release activities to improve application reliability.
- Work with service integrations and cloud deployment workflows while gaining hands-on exposure to end-to-end product development in a live environment.

Software Development Intern — **Mar 2025 – Jun 2025**
KodNest Technologies — Bengaluru, Karnataka

- Built and tested **REST APIs using Java, Spring Boot, and MySQL** following layered architecture and clean coding practices.
- Implemented backend functionality and database operations for application workflows using object-oriented programming principles.
- Used **Git** for version control and collaborated in Agile development cycles with team members.
- Tested APIs using **Postman** and debugged application issues to improve reliability and correctness.

Projects

SalesSavvy | Full-Stack E-Commerce Platform — GitHub

- Developed a full-stack e-commerce application using **Java, Spring Boot, React, and MySQL**.
- Implemented REST APIs for authentication, product catalog, cart operations, and order processing.
- Secured backend services using **Spring Security, JWT authentication, and role-based access control**.

SkillSwap | Full-Stack Web Platform — GitHub

- Built a full-stack web application using **Node.js, Express.js, React, and MongoDB**.
- Developed REST APIs for authentication, user management, and application workflows.
- Designed modular CRUD-based backend operations and integrated frontend components with REST APIs.

MealMate | Full-Stack Meal Planning Application — GitHub

- Developed a full-stack meal planning application using **Python, Django, React, and Vite.js**.
- Implemented backend application logic, API communication, and modular components for maintainable workflows.

Vehicle Movement Analysis | Intel Unnati – Edge AI Project — GitHub

- Developed an Edge AI-based vehicle movement analysis project using **Python and SQL** for data processing and analytical workflows.
- Applied computer vision and edge-based analysis techniques to detect and evaluate vehicle movement patterns.

Education

Bachelor of Engineering, Electronics and Communication Engineering — **2021 – 2025**
Sharnbasva University, Kalaburagi — **CGPA: 9.72/10**

Department Topper | Gold Medalist

Certifications

Microsoft Azure AI Essentials Professional Certificate (2026) | **DevOps Professional Certificate – PagerDuty** (2026)
Full Stack Development – KodNest (2025) | **Intel Unnati Training – Edge AI / Distributed Systems** (2024)
